

## Internet Resources

### General information for Marin County

[http://www.marinwatersheds.org/landowner\\_help.html](http://www.marinwatersheds.org/landowner_help.html) Extensive list of resources with links and downloads for all things creek-related. Other parts of the websites contain information on Marin County watersheds and announcements of events and meetings.

### Native Plants for Landscaping and Wildlife:

Two local nurseries have excellent information on which plants to put where, and lists of plants for attracting pollinators:

<http://www.mostlynatives.com/>

<http://www.calfloranursery.com/>

Habitat gardening tips from California Native Plant Society. Plants for birds, bees, and other wildlife species.

<http://www.cnps.org/cnps/grownative/habitat/>

A fun website created by a conservation biologist to help homeowners:

<http://www.ecosystemgardening.com/>

Bay Area Landscape Guidelines

[http://www.stopwaste.org/docs/bay-friendly\\_landscape\\_guidelines\\_-\\_all\\_chapters.pdf](http://www.stopwaste.org/docs/bay-friendly_landscape_guidelines_-_all_chapters.pdf)

### Rainwater Harvesting

Resource lists and downloadable guides from the Occidental Arts & Ecology Center's Water Institute:

<http://www.oaecwater.org/education/roofwater-harvesting>

Rainwater catchment guru Brad Lancaster's site:

<http://www.harvestingrainwater.com/rainwater-harvesting-inforesources/>

Information-sharing site with many excellent resources and articles:

<http://www.harvesth2o.com/>

## **Salmon and Steelhead**

A study guide for 6<sup>th</sup> grade students, but thorough explanation of coho salmon and steelhead life cycles and habitat needs:

[http://sns.ucdavis.edu/index.php/background\\_information#The Salmon and Steelhead Life Cycle](http://sns.ucdavis.edu/index.php/background_information#The_Salmon_and_Steelhead_Life_Cycle)

Clear description of all stages of coho, steelhead, and Chinook lifecycles:

<http://www.fishnet4c.org/pdf/Roads%20Manual%20PDFs%2007/Chapter%204%20Stream%20Habitat-%20Salmon%20Fisheries%20update%202-07.pdf>

## **Rainwater infiltration**

Resources, plans and specifications, and general information on low impact stormwater development techniques such as bioswales, rain gardens, and green roofs:

<http://www.lid-stormwater.net/homedesign.htm>

Benefits and instructions for rain gardens:

<http://www.raingardennetwork.com/about.htm>
