

AGENDA

Marin Resource Conservation District's CEQA-Streamlined Permit Coordination Program (PCP)

1. Introductions

- Purpose of meeting
- PCP background and expansion
- Audience Introductions
- Mission of the RCD
- Objectives of PCP
 - Geographic area
 - Practices & associated activities

2. Usefulness

- How agencies might participate in the PCP

3. Case Study:

- How are projects proposed and selected?
- How are individual projects vetted and approved for use of PCP?
- How are resource protection requirements guaranteed? (e.g., use of required BMPs; assessment of biological and/or cultural issues of concern; implementation of needed mitigation measures)
- When/why is licensed engineering required?
- When/why is on-site biological or cultural oversight required?
- What are the monitoring and project closeout requirements?
- Comparison of PCP with standard process including approximate time and cost to complete

4. Other examples of programmatic CEQA opportunities

- Sonoma County Water Agency Zones 2A and 3A—Initial Study/Mitigated Negative Declaration used by Sonoma Ecology Center
- Sonoma RCD LandSmart Program
- Mendocino County RCD Countywide Permit Coordination Program
