

## **LIMITED TIME OFFER: REBATES**

# ELIGIBLE WATER-CONSERVING PRODUCTS

The following water-conserving products are eligible for a rebate under this limited time offer. Products that are parts of these systems but not listed here are not eligible. To qualify, products must be new and installed at single-family or duplex residential properties where water service is provided by MMWD. Rebates cover the cost of the product up to \$50 per product category, excluding tax, delivery, and labor. Products must be purchased on or after October 25, 2014.

### **POOL COVERS**

Rebates are for new covers specifically made for pools. Rebates do not apply to secondhand covers, mesh covers, or chemical/liquid covers.

### **HOT WATER RECIRCULATING SYSTEMS**

Eligible components include electric pumps and thermal bypass valves that create one continuous water supply loop to recirculate water throughout the home.

### **ORGANIC MULCH**

Organic mulch, including bark, straw, or compost, is eligible. Inorganic materials, such as rocks, gravel, decomposed granite, or other non-biodegradable materials, are not eligible. MMWD suggests a minimum 3-inch layer of mulch.

### **LAUNDRY-TO-LANDSCAPE SYSTEM COMPONENTS**

Eligible components include a 3-way diverter valve to direct the flow of graywater to the landscape or to the sewer, and/or an air vent to prevent accidental siphoning of water from the clothes washer. Product must be installed as part of a residential laundry-to-landscape system that uses discharge water from a single domestic clothes washer and meets all requirements for graywater systems as described in the California Plumbing Code. Other system components, including tubing, plumbing parts, outlets, mulch shields, and components installed as part of more complex graywater systems, do not qualify.

### **RAIN BARRELS**

Only finished containers sold exclusively for rainwater collection are eligible. Secondhand or self-made rain barrels do not qualify. Barrels must have fixed screens and safety covers that prevent entry of children, mosquitoes, and animals.
