“New at Cal-IPC” section)
or scan the code below!

Did you know that invasive plants are one of the greatest threats to diversity in our natural areas? Do you work to control invasive plants, or would you like to? Whether you are an experienced stewardship volunteer or just thinking about getting involved...

Join local experts for a training workshop for volunteers!

Workshop topics will include:

- Biology and ecology of invasive plants
- Management approaches and prevention best practices
- Strategies for success over time
- Using Calflora and your smartphone to map weeds
- Collaborating and sharing information
- Resources for plant ID and control methods
- Coordinating volunteer efforts

Program participants will gain skills to steward natural areas in their local community!
